COVID-19 Arizona Response

Key COVID-19 Facts

<table>
<thead>
<tr>
<th>1 confirmed case of COVID-19 in Arizona; now recovered</th>
<th>0 deaths due to COVID-19 in Arizona</th>
<th>89,254 international cases of COVID-19</th>
</tr>
</thead>
<tbody>
<tr>
<td>Approximately 250 returning travelers monitored in AZ</td>
<td>Up to 450 samples per day can be tested by Arizona State Public Health Lab</td>
<td>86 U.S. cases of COVID-19</td>
</tr>
</tbody>
</table>

What we know

COVID-19 is a respiratory infection caused by a virus.

Symptoms range from mild to severe and include fever, cough, and shortness of breath.

- Those at highest risk of severe disease are the elderly and/or those with underlying chronic medical conditions
- Those with recent travel to an area with ongoing transmission of COVID-19 or contact with someone who is infected are at highest risk of becoming infected

The virus is spread person-to-person through respiratory droplets.

There is no current vaccine or specific treatment for COVID-19.

What the state is doing

- Testing for COVID-19
- Coordinating case and contact follow up
- Developing guidance for partners
- Implementing preparedness plans
- Communicating with CDC and partners
- Surveillance for the disease

What you can do to prevent COVID-19

1. Wash your hands often with soap and water for at least 20 seconds
2. Stay home if you are sick
3. Cover your coughs and sneezes with a tissue or your elbow
4. Avoid touching your eyes, nose, and mouth with unwashed hands
5. Avoid close contact with people who are sick
6. Clean and disinfect frequently touched objects and surfaces
7. Get your seasonal influenza vaccine
8. If you need to see a healthcare provider, consider using telemedicine, if this is an option
9. Get up-to-date information on COVID-19 from reputable sources like CDC, ADHS, or your local health department
